PDL Category: Topical - Emollients

<u>Comparable Products</u>	<u>Preferred Drug List/ Recommended Drug List Status</u>
Vanamide® Cream	Preferred
Urea 40% Lotion	Preferred

Summary

Indications and Usage: For wound debridement and promotion of normal healing of hyperkeratotic surface lesions, particularly where healing is slowed by local infection, necrotic tissue, fibrinous or purulent debris, or eschar. Can also be useful for the treatment of hyperkeratotic conditions such as rough, dry skin, dermatitis, psoriasis, xerosis, ichthyosis, eczema, keratosis, keratoderma, corns, calluses, as well as damaged, ingrown, and devitalized nails.

Dosage Forms: Cream, 40%

Recommended Dosage: Apply to affected area(s) twice daily; smooth over affected tissue until cream is absorbed. May be covered with adhesive bandage or gauze

Common Adverse Drug Reactions: Transient stinging, burning, itching, local irritation.

Contraindications: Known hypersensitivity to any listed ingredients in the formulation

Manufacturer: Taro Pharmaceuticals

Analysis: Several preferred topical medications exist on the Preferred Drug List that have identical active ingredients as U-KERA® which are more cost effective.
