

Iowa Medicaid Drug Prior Authorization Criteria

The drug prior authorization unit will consider other conditions as listed in the compendia on an individual basis after reviewing documentation submitted regarding the medical necessity. The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated. Duplicate use of drugs from the same therapeutic category or therapeutic duplication will not be considered. All required trials must be of appropriate dose and duration for the indication and must be documented by the prescriber, on the request for prior authorization form, including dates, dose, and nature of failure. The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

Updated 1/01/2025

<p>Acute Migraine Treatments</p> <p><i>Use Acute Migraine Treatments PA form</i></p>	<p>No prior authorization (PA) is required for preferred acute migraine treatments, as indicated on the Preferred Drug List (PDL). PA is required for acute migraine treatments under the following conditions:</p> <ol style="list-style-type: none"> 1. A diagnosis of acute migraine; and 2. Patient meets the FDA approved age for requested agent; and 3. For preferred acute migraine treatments where PA is required, as indicated on the PDL, documentation of previous trials and therapy failures with two preferred agents that do not require PA; and/or 4. For non-preferred acute migraine treatments, documentation of previous trials and therapy failures with two preferred agents that do not require PA. Requests for non-preferred CGRP inhibitors will also require documentation of a trial and therapy failure with a preferred CGRP inhibitor; and/or 5. For quantities exceeding the established quantity limit for each agent, documentation of current prophylactic therapy or documentation of previous trials and therapy failures with two different prophylactic medications; and/or 6. For non-preferred combination products, documentation of separate trials and therapy failures with the individual ingredients, in addition to the above criteria for preferred or non-preferred acute migraine treatments requiring PA. <p>The required trials may be overridden when documented evidence is provided that use of these agents would be medically contraindicated.</p>
<p>ADD/ADHD/ NARCOLEPSY AGENTS</p> <p><i>Use CNS Stimulants and Atomoxetine PA form</i></p>	<p><i>See CNS Stimulants and Atomoxetine Prior Authorization (PA) Criteria.</i></p>

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. Certain drugs are allowed a 7 day supply while prior authorization is being requested. PDL IMPLEMENTATION DATE 01-15-05

<p>Adenosine Triphosphate-Citrate Lyase (ACL) Inhibitors</p> <p><i>Use Adenosine Triphosphate-Citrate Lyase (ACL) Inhibitors PA form</i></p>	<p>Prior authorization (PA) is required for adenosine triphosphate-citrate lyase (ACL) inhibitors. Payment will be considered under the following conditions:</p> <ol style="list-style-type: none"> 1. Patient meets the FDA approved age; and 2. Documentation of adherence to prescribed lipid lowering medications (including a maximally tolerated statin), prior to ACL inhibitor therapy, for the previous 90 days is provided (further defined below, by diagnosis); and 3. Documentation is provided that medication will be used in combination with a maximally tolerated statin; and 4. A baseline and current lipid profile is provided. Baseline lipid profile is defined as a lipid profile obtained prior to pharmacologic therapy; and 5. Patient will continue to follow an appropriate low fat diet; and 6. Is prescribed by or in consultation with a lipidologist, cardiologist, or endocrinologist; and 7. If patient is taking in combination with: <ol style="list-style-type: none"> a. Simvastatin, dose does not exceed 20mg per day; or b. Pravastatin, dose does not exceed 40mg per day; and 8. Concurrent use with a PCSK9 inhibitor will not be considered; and 9. Goal is defined as a 50% reduction in untreated baseline LDL-C; and 10. Is prescribed for one of the following diagnoses: <ol style="list-style-type: none"> a. Heterozygous Familial Hypercholesterolemia (HeFH): <ol style="list-style-type: none"> i. Documentation is provided verifying diagnosis (attach documentation/results), as evidenced by: <ol style="list-style-type: none"> 1. Clinical manifestations of HeFH (e.g. tendon xanthomas, cutaneous xanthomas, arcus cornea, tuberous xanthomas, or xanthelasma) or; 2. Confirmation of diagnosis by gene or receptor testing; and ii. Documentation of untreated LDL-C \geq 190 mg-dL; and iii. Patient is unable to reach LDL-C goal with a minimum of two separate, chemically distinct statin trials used in combination with other lipid lowering medications. Trials are defined as: concurrent use of a maximally tolerated dose of a statin (must include atorvastatin and rosuvastatin), PLUS ezetimibe 10mg daily; or b. Clinical Atherosclerotic Cardiovascular Disease (ASCVD): <ol style="list-style-type: none"> i. History of MI, angina, coronary or other arterial revascularization, stroke, TIA, or PVD of atherosclerotic origin; and ii. Patient is unable to reach LDL-C goal with a minimum of two separate, chemically distinct statin trials used in combination with other lipid lowering medications. Trials are defined as: concurrent use of a maximally tolerated dose of a statin (must include atorvastatin and rosuvastatin), PLUS ezetimibe 10mg daily, <p>If criteria for coverage are met, requests will be approved for 3 months. Additional authorizations will be considered at yearly intervals under the following conditions:</p> <ol style="list-style-type: none"> a. Patient continues therapy with a maximally tolerated statin dose and remains at goal; and b. Patient continues to follow an appropriate low fat diet; and c. Documentation of LDL reduction is provided. <p>The required trials may be overridden when documented evidence is provided that use of these agents would be medically contraindicated.</p>

Updated 1/01/2025

<p>Age Edit Override – Codeine or Tramadol</p> <p><i>Use Age Edit Override- Codeine or Tramadol PA form</i></p>	<p>An age edit override for codeine or tramadol is required for patients under 18 years of age. Payment will be considered under the following conditions:</p> <ol style="list-style-type: none"> 1. Member is 12 years of age or older; and 2. Medication is not being prescribed to treat pain after surgery following tonsil and/or adenoid procedure for members 12 to 18 years of age; and 3. If member is between 12 and 18 years of age, member is not obese (BMI greater than 30kg/m²), does not have obstructive sleep apnea, or severe lung disease.
<p>Alpelisib (Vijoice)</p> <p><i>Use Alpelisib (Vijoice) PA form</i></p>	<p>Prior authorization (PA) is required for alpelisib (Vijoice). Requests for non-preferred agents may be considered when documented evidence is provided that the use of the preferred agent(s) would be medically contraindicated. Payment will be considered for an FDA approved or compendia indicated diagnosis for the requested drug when the following conditions are met:</p> <ol style="list-style-type: none"> 1. Request adheres to all FDA approved labeling for requested drug and indication, including age, dosing, contraindications, warnings and precautions, drug interactions, and use in specific populations; and 2. Patient has a diagnosis of PIK3CA-Related Overgrowth Spectrum (PROS) confirmed by genetic testing demonstrating a <i>PIK3CA</i> mutation; and 3. Patient’s condition is severe or life-threatening requiring systemic therapy as determined by treating prescriber: and 4. Patient has at least one target lesion identified on imaging. <p>The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated. If criteria for coverage are met, initial authorization will be given for 6 months to assess the response to treatment. Request for continuation of therapy will be considered with documentation of a positive response to therapy as evidenced by a reduction in sum of measurable lesion volume across 1 to 3 target lesions.</p>

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. <p>Alpha₁-Proteinase Inhibitor Enzymes</p> <p><i>Use Alpha₁-Proteinase Inhibitor Enzymes PA form</i></p>	<p>Prior authorization (PA) is required for Alpha₁-Proteinase Inhibitor enzymes. Payment for a non-preferred Alpha₁-Proteinase Inhibitor enzyme will be authorized only for cases in which there is documentation of previous trial and therapy failure with a preferred agent. Payment will be considered for patients when the following is met:</p> <ol style="list-style-type: none"> 1. Patient has a diagnosis of congenital alpha₁-antitrypsin (AAT) deficiency; with a pretreatment serum concentration of AAT less than 11µM/L or <ol style="list-style-type: none"> a. 80mg/dl if measured by radial immunodiffusion, or b. 50mg/dl if measured by nephelometry; and 2. Patient has a high-risk AAT deficiency phenotype (PiZZ, PiZ (null), or PI (null)(null) or other phenotypes associated with serum AAT concentrations of less than 11µM/L, such as PiSZ or PiMZ); and 3. Patient has documented progressive panacinar emphysema with a documented rate of decline in forced expiratory volume in 1 second (FEV₁); and 4. Patient is 18 years of age or older; and 5. Patient is currently a non-smoker; and 6. Patient is currently on optimal supportive therapy for obstructive lung disease (inhaled bronchodilators, inhaled steroids); and 7. Medication will be administered in the member's home by home health or in a long-term care facility. <p>If the criteria for coverage are met, initial requests will be given for 6 months. Additional authorizations will be considered at 6 month intervals when the following criteria are met:</p> <ol style="list-style-type: none"> 1. Evidence of clinical efficacy, as documented by: <ol style="list-style-type: none"> a. An elevation of AAT levels (above protective threshold i.e., > 11µM/L); and b. A reduction in rate of deterioration of lung function as measured by a decrease in the FEV₁ rate of decline; and 2. Patient continues to be a non-smoker; and 3. Patient continues supportive therapy for obstructive lung disease.
<p>Amylino Mimetic (Symlin)</p> <p><i>Use Amylino Mimetic (Symlin) PA form</i></p>	<p>Prior authorization (PA) is required for amylyno mimetics (Symlin). Payment will be considered under the following conditions :</p> <ol style="list-style-type: none"> 1. Diagnosis of Type 1 or Type 2 diabetes mellitus, 2. Concurrent use of insulin therapy, 3. Documentation of blood glucose monitoring three or more times daily, 4. Inadequate reduction in HbgA1C despite multiple titration with basal/bolus insulin dosing regimens. <p>Initial authorizations will be approved for six months; additional PAs will be considered on an individual basis after review of medical necessity and documented improvement in HbgA1C since the beginning of the initial PA period.</p>

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. <p>Antidepressants</p> <p><i>Aplenzin</i> <i>Auvelity</i> <i>Fetzima</i></p> <p><i>Use Antidepressants PA form</i></p>	<p>Prior authorization (PA) is required for non-preferred antidepressants subject to clinical criteria. Payment will be considered when patient has an FDA approved or compendia indication for the requested drug when the following criteria are met:</p> <ol style="list-style-type: none"> 1. Request adheres to all FDA approved labeling for requested drug and indication, including age, dosing, contraindications, warnings and precautions, drug interactions, and use in specific populations; and 2. Documentation of a previous trial and therapy failure at a therapeutic dose with two preferred generic SSRIs; and 3. Documentation of a previous trial and therapy failure at a therapeutic dose with one preferred generic SNRI; and 4. Documentation of a previous trial and therapy failure at a therapeutic dose with one non-SSRI/SNRI generic antidepressant; and 5. Documentation of a previous trial and therapy failure at a therapeutic dose with vilazodone; and 6. Documentation of a previous trial and therapy failure at a therapeutic dose with vortioxetine; and 7. Documentation of a previous trial and therapy failure at a therapeutic dose with an antidepressant plus adjunct; and 8. If the request is for dextromethorphan and bupropion extended-release tablet (Auvelity), one of the trials must include a previous trial and inadequate response at a therapeutic dose with an extended-release bupropion agent; and 9. If the request is for an isomer, prodrug or metabolite of the requested medication, one of the trials must be with the preferred parent drug of the same chemical entity that resulted in a partial response with a documented intolerance. <p>The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated.</p>
<p>Anti-Diabetics, Non-Insulin Agents</p> <p><i>Use Anti-Diabetics, Non-Insulin PA form</i></p>	<p>Prior authorization (PA) is required for select preferred anti-diabetic, non-insulin agents subject to clinical criteria. Payment will be considered under the following conditions:</p> <ol style="list-style-type: none"> 1. Request adheres to all FDA approved labeling for requested drug and indication, including age, dosing, contraindications, warnings and precautions, drug interactions, and use in specific populations; and 2. For the treatment of Type 2 Diabetes Mellitus, a current A1C is provided; and 3. Requests for non-preferred antidiabetic, non-insulin agents subject to clinical criteria, will be authorized only for cases in which there is documentation of previous trials and therapy failures with a preferred drug in the same class. Additionally, requests for a non-preferred agent for the treatment of Type 2 Diabetes Mellitus must document previous trials and therapy failures with at least 3 preferred agents from 3 different drug classes at maximally tolerated doses. <p>The required trials may be overridden when documented evidence is provided that use of these agents would be medically contraindicated.</p> <p>Requests for weight loss are not a covered diagnosis of use and will be denied.</p>

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. <p>Anti-Fungal- Oral / Injectable</p> <p><i>Use Anti-Fungal PA form</i></p>	<p>Prior authorization (PA) is not required for preferred antifungal therapy for a cumulative 90 days of therapy per 12-month period per patient. PA will be required for all non-preferred antifungal therapy beginning the first day of therapy. Payment for a non-preferred antifungal will be authorized only for cases in which there is documentation of previous trial and therapy failure with a preferred agent. Payment for any antifungal therapy beyond a cumulative 90 days of therapy per 12-month period per patient will be authorized in cases where the patient has a diagnosis of an immunocompromised condition or a systemic fungal infection. This PA requirement does not apply to nystatin.</p>		
<p>Antihistamines</p> <p><i>Use Antihistamine PA form</i></p>	<p>Prior authorization (PA) is required for all non-preferred oral antihistamines.</p> <p>Patients 21 years of age and older must have three unsuccessful trials with antihistamines that do not require PA, prior to the approval of a non-preferred oral antihistamine. Two of the trials must be with cetirizine and loratadine.</p> <p>Patients 20 years of age and younger must have unsuccessful trials with cetirizine and loratadine prior to the approval of a non-preferred oral antihistamine.</p> <p>The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated.</p>		

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. Certain drugs are allowed a 7 day supply while prior authorization is being requested. PDL IMPLEMENTATION DATE 01-15-05

Iowa Medicaid Drug Prior Authorization Criteria

The drug prior authorization unit will consider other conditions as listed in the compendia on an individual basis after reviewing documentation submitted regarding the medical necessity. The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated. Duplicate use of drugs from the same therapeutic category or therapeutic duplication will not be considered. All required trials must be of appropriate dose and duration for the indication and must be documented by the prescriber, on the request for prior authorization form, including dates, dose, and nature of failure. The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

Updated 1/01/2025

<p>Apremilast (Otezla)</p> <p><i>Use Apremilast (Otezla) PA form</i></p>	<p>Prior authorization (PA) is required for apremilast (Otezla). Payment will be considered under the following conditions:</p> <ol style="list-style-type: none"> 1. Request adheres to all FDA approved labeling for indication, including age, dosing, and contraindications; and 2. Patient has a diagnosis of active psoriatic arthritis (≥ 3 swollen joints and ≥ 3 tender joints); with <ol style="list-style-type: none"> a. Documentation of a trial and inadequate response to therapy with the preferred oral DMARD, methotrexate (leflunomide or sulfasalazine may be used if methotrexate is contraindicated); or 3. Patient has a diagnosis of plaque psoriasis; with <ol style="list-style-type: none"> a. Documentation of a trial and inadequate response to phototherapy, systemic retinoids, methotrexate, or cyclosporine; or 4. Patient has a diagnosis of Behçet disease; with <ol style="list-style-type: none"> a. Documentation of active oral ulcers associated with Behçet disease; and b. Documentation of a previous trial and inadequate response, at a therapeutic dose, to colchicine. <p>The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated.</p>
<p>Aripiprazole Tablets with Sensor (Abilify MyCite)</p> <p><i>Use Aripiprazole Tablets with Sensor (Abilify MyCite) PA form</i></p>	<p>Prior authorization is required for aripiprazole tablets with sensor (Abilify MyCite). Payment will be considered under the following conditions:</p> <ol style="list-style-type: none"> 1. Patient has a diagnosis of Schizophrenia, Bipolar I Disorder, or Major Depressive Disorder; and 2. Patient meets the FDA approved age for use of the Abilify MyCite device; and 3. Dosing follows the FDA approved dose for the submitted diagnosis; and 4. Documentation of patient adherence to generic aripiprazole tablets is less than 80% within the past 6 months (prescriber must provide documentation of the previous 6 months' worth of pharmacy claims for aripiprazole documenting non-adherence); and 5. Documentation all the following strategies to improve patient adherence have been tried without success: <ol style="list-style-type: none"> a. Utilization of a pill box b. Utilization of a reminder device (e.g. alarm, application, or text reminder) c. Involving family members or friends to assist d. Coordinating timing of dose with dosing of another daily medication; and 6. Documentation of a trial and intolerance to a preferred long-acting aripiprazole injectable agent; and 7. Prescriber agrees to track and document adherence of Abilify MyCite through the web-based portal for health care providers and transition member to generic aripiprazole tablets after a maximum of 4 months use of Abilify MyCite. Initial approvals will be given for one month. Prescriber must review member adherence in the web-based portal and document adherence for additional consideration. If non-adherence continues, prescriber must document a plan to improve adherence. If adherence is improved, consideration to switch member to generic aripiprazole tablets must be considered. Note, the ability of Abilify MyCite to improve patient compliance has not been established, 8. Requests will not be considered for patients in long-term care facilities. 9. A once per lifetime approval will be allowed. <p>The required trials may be overridden when documented evidence is provided that use of these agents would be medically contraindicated.</p>

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. Certain drugs are allowed a 7 day supply while prior authorization is being requested. PDL IMPLEMENTATION DATE 01-15-05

Iowa Medicaid Drug Prior Authorization Criteria

The drug prior authorization unit will consider other conditions as listed in the compendia on an individual basis after reviewing documentation submitted regarding the medical necessity. The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated. Duplicate use of drugs from the same therapeutic category or therapeutic duplication will not be considered. All required trials must be of appropriate dose and duration for the indication and must be documented by the prescriber, on the request for prior authorization form, including dates, dose, and nature of failure. The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

Updated 1/01/2025

<p>Baclofen</p> <p><i>Use Baclofen PA form</i></p>	<p>Prior authorization (PA) is required for non-preferred baclofen dosage forms. Payment for a non-preferred agent will be considered only for cases in which there is documentation of a previous trial and therapy failure with a preferred agent. Payment will be considered under the following conditions:</p> <ol style="list-style-type: none"> 1. Patient has a diagnosis of spasticity resulting from multiple sclerosis (relief of flexor spasms and concomitant pain, clonus, and muscular rigidity) or spinal cord injuries/diseases; and 2. Patient meets the FDA approved age; and 3. Documentation of a patient-specific, clinically significant reason (beyond convenience) why the member cannot use baclofen oral tablets, even when tablets are crushed and sprinkled on soft food or liquid. Presence of a nasogastric (NG) tube/J-tube alone are not reasons for approval; and 4. Request does not exceed the maximum dosage of 80mg daily.
<p>Benzodiazepines</p> <p><i>Use Benzodiazepine PA form</i></p>	<p>Prior authorization (PA) is required for non-preferred benzodiazepines. Payment for non-preferred benzodiazepines will be authorized in cases with documentation of previous trial and therapy failure with two preferred products. If a long-acting medication is requested, one of the therapeutic trials must include the immediate release form of the requested benzodiazepine. The prescriber must review the patient's use of controlled substances on the Iowa Prescription Monitoring Program website and determine if the use of a benzodiazepine is appropriate for this member.</p> <p>PA will be approved for up to 12 months for documented:</p> <ol style="list-style-type: none"> 1. Generalized anxiety disorder. 2. Panic attack with or without agoraphobia. 3. Seizure. 4. Non-progressive motor disorder. 5. Dystonia. <p>PA requests will be approved for up to a three-month period for all other diagnoses related to the use of benzodiazepines.</p> <p>For patients taking concurrent opioids, the prescriber must document the following:</p> <ol style="list-style-type: none"> 1. The risks of using opioids and benzodiazepines concurrently has been discussed with the patient; and 2. Documentation as to why concurrent use is medically necessary is provided; and 3. A plan to taper the opioid or benzodiazepine is provided, if appropriate. <p>The required trials may be overridden when documented evidence is provided that use of these agents would be medically contraindicated.</p>

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. CNS Stimulants and Atomoxetine	<p>Prior authorization (PA) is required for CNS stimulants and atomoxetine for patients 21 years of age or older. Prior to requesting PA for any covered diagnosis, the prescriber must review the patient's use of controlled substances on the Iowa Prescription Monitoring Program website. Request must adhere to all FDA approved labeling for requested drug and indication, including age, dosing, contraindications, warnings and precautions, drug interactions, and use in specific populations. Payment for CNS stimulants and atomoxetine will be considered when patient has an FDA approved or compendia indication for requested drug under the following conditions:</p> <ol style="list-style-type: none">1. Attention Deficit Hyperactivity Disorder (ADHD) meeting the DSM-5 criteria and confirmed by a standardized rating scale (such as Conners, Vanderbilt, Brown, SNAP-IV). Symptoms must have been present before twelve (12) years of age and there must be clear evidence of clinically significant impairment in two or more current environments (social, academic, or occupational). Documentation of a recent clinical visit that confirms improvement in symptoms from baseline will be required for renewals or patients newly eligible that are established on medication to treat ADHD. Adults (≥ 21 years of age) are limited to the use of long-acting agents only. If a supplemental dose with a short-acting agent is needed for an adult in the mid to late afternoon, requests will be considered under the following circumstances: the dose of the long-acting agent has been optimized, documentation is provided a short-acting agent of the same chemical entity is medically necessary (e.g. employed during the day with school in the evening, and will be limited to one unit dose per day. Children (< 21 years of age) are limited to the use of long-acting agents with one unit of a short acting agent per day. Use of an amphetamine agent plus a methylphenidate agent will not be considered for a diagnosis of ADHD.2. Narcolepsy with diagnosis confirmed with a recent sleep study (ESS, MSLT, PSG).3. Excessive sleepiness from obstructive sleep apnea/hypopnea syndrome (OSAHS) with documentation of non-pharmacological therapies tried (weight loss, position therapy, CPAP at maximum titration, BiPAP at maximum titration or surgery) and results from a recent sleep study (ESS, MSLT, PSG) with the diagnosis confirmed by a sleep specialist.4. Binge Eating Disorder (Vyvanse only)<ol style="list-style-type: none">a. Patient is 18 to 55 years of age; andb. Patient meets DSM-5 criteria for Binge Eating Disorder (BED); andc. Patient has documentation of moderate to severe BED, as defined by the number of binge eating episodes per week (number of episodes must be reported); andd. Patient has documentation of non-pharmacologic therapies tried, such as cognitive-behavioral therapy or interpersonal therapy, for a recent 3 month period, that did not significantly reduce the number of binge eating episodes; ande. Prescription is written by a psychiatrist, psychiatric nurse practitioner, or psychiatric physician assistant; andf. Patient has a BMI of 25 to 45; andg. Patient does not have a history of cardiovascular disease; andh. Patient has no history of substance abuse; andi. Is not being prescribed for the treatment of obesity or weight loss; andj. Doses above 70mg per day will not be considered.k. Initial requests will be approved for 12 weeks.l. Requests for renewal must include documentation of a change from baseline at week 12 in the number of binge days per week. <p style="text-align: center;"><u>DSM-5 Criteria</u></p> <ol style="list-style-type: none">i. Recurrent episodes of binge eating, including eating an abnormally large amount of food in a discrete period of time and has a feeling of lack of control overeating; andii. The binge eating episodes are marked by at least three of the following:

Patient has ≥ 15 intraepithelial eosinophils per high-power field (eos/hp) as confirmed by endoscopic esophageal biopsy (attach results); and c. Patient has signs and symptoms of esophageal dysfunction (e.g., dysphagia, food impaction, food refusal, abdominal pain, heartburn regurgitation, chest pain and/or, odynophagia); and d. Documentation of previous trials and therapy failures with all of the following: <ul style="list-style-type: none"> i. High dose proton pump inhibitor (PPI) for at least 8 weeks; and ii. Swallowed topical corticosteroid (e.g., fluticasone propionate, oral budesonide suspension); and iii. Dietary therapy; or <p>7. Patient has a diagnosis of moderate to severe prurigo nodularis (PN); and</p> <ul style="list-style-type: none"> a. Is prescribed by, or in consultation with an allergist, immunologist, or dermatologist; and b. Patient has experienced severe to very severe pruritis, as demonstrated by a current Worst Itch-Numeric Rating Scale (WI-NRS) ≥ 7; and c. Patient has ≥ 20 nodular lesions (attach documentation); and d. Documentation of a previous trial and therapy failure with a high or super high potency topical corticosteroid for at least 14 consecutive days; and <p>8. Dose does not exceed the FDA approved dosing for indication.</p> <p>If criteria for coverage are met, initial authorization will be given for 6 months to assess the response to treatment. Request for continuation of therapy will require documentation of a positive response to therapy.</p> <p>The required trials may be overridden when documented evidence is provided that use of these agents would be medically contraindicated.</p>
<p>Duplicate Therapy Edits</p> <p>Antipsychotics NSAIDs</p> <p><i>Use Duplicate Therapy Edit Override PA form</i></p>	<p>Designated therapeutic classes are subject to duplicate therapy edits. Providers should submit a Prior Authorization request for override consideration.</p>

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. Certain drugs are allowed a 7 day supply while prior authorization is being requested. PDL IMPLEMENTATION DATE 01-15-05

Iowa Medicaid Drug Prior Authorization Criteria

The drug prior authorization unit will consider other conditions as listed in the compendia on an individual basis after reviewing documentation submitted regarding the medical necessity. The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated. Duplicate use of drugs from the same therapeutic category or therapeutic duplication will not be considered. All required trials must be of appropriate dose and duration for the indication and must be documented by the prescriber, on the request for prior authorization form, including dates, dose, and nature of failure. The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

<p>Erythropoiesis Stimulating Agents</p> <p><i>Use Erythropoiesis Stimulating Agent PA form</i></p>	<p>Prior authorization (PA) is required for erythropoiesis stimulating agents prescribed for outpatients for the treatment of anemia. Payment for non-preferred erythropoiesis stimulating agents will be authorized only for cases in which there is documentation of previous trial and therapy failure with a preferred agent.</p> <p>Patients who meet all of the following criteria may receive PA for the use of erythropoiesis stimulating agents:</p> <ol style="list-style-type: none"> 1. Hemoglobin less than 10g/dL. If renewal of prior authorization is being requested, a hemoglobin less than 11g/dL (or less than 10g/dL for patients with Chronic Kidney Disease (CKD) not on dialysis) will be required for continued treatment. Hemoglobin laboratory values must be dated within four weeks of the prior authorization request. 2. Transferrin saturation greater than or equal to 20 percent (transferrin saturation is calculated by dividing serum iron by the total iron binding capacity), ferritin levels greater than or equal to 100 mg/ml, or on concurrent therapeutic iron therapy. Transferrin saturation or ferritin levels must be dated within three months of the prior authorization request. 3. For HIV-infected patients, the endogenous serum erythropoietin level must be less than or equal to 500 mU/ml to initiate therapy. 4. No evidence of untreated GI bleeding, hemolysis, or Vitamin B-12, iron or folate deficiency.
<p>Extended Release Formulations</p> <p><i>Use Extended Release Formulations PA form</i></p>	<p>Payment for a non-preferred extended release formulation will be considered for an FDA approved or compendia indicated diagnosis for the requested drug when the following criteria are met:</p> <ol style="list-style-type: none"> 1. Request adheres to all FDA approved labeling for requested drug and indication, including age, dosing, contraindications, warnings and precautions, drug interactions, and use in specific populations; and 2. Previous trial and therapy failure with the preferred immediate release product of the same chemical entity at a therapeutic dose that resulted in a partial response with a documented intolerance; and 3. Previous trial and therapy failure at a therapeutic dose with a preferred drug of a different chemical entity indicated to treat the submitted diagnosis. <p>The required trials may be overridden when documented evidence is provided that use of these agents would be medically contraindicated.</p> <p>Prior authorization (PA) is required for the following extended release formulation(s): Amoxicillin & Pot Clavulanate ER, Astagraf XL,, Cardura XL, Carvedilol ER, Coreg CR, Crexont, Doryx, Elepsia XR, Envarsus XR, Fluoxetine DR 90mg, Fluvoxamine ER, Gabapentin ER, Glumetza, Gocovri, Gralise, Kapsargo, , Memantine ER, Motpoly XR, Namenda XR, Osmolex ER, Oxcarbazepine ER, Oxtellar XR, Pramipexole ER, Pregabalin ER, Qudexy XR, Rayos, Ropinirole ER, Rythmol SR, Solodyn ER, Topiramate ER, Trokendi XR.</p>
<p>Fentanyl, Short Acting Products</p> <p><i>Use Short Acting Fentanyl Products PA form</i></p>	<p>Prior authorization (PA) is required for short acting fentanyl products. Payment will be considered only if the diagnosis is for breakthrough cancer pain in opioid tolerant patients. These products carry a Black Box Warning.</p> <p>Short acting fentanyl products:</p> <ol style="list-style-type: none"> 1. Are indicated only for the management of breakthrough cancer pain in patients with malignancies already receiving and tolerant to opioid therapy for their underlying persistent cancer pain. 2. Are contraindicated in the management of acute or postoperative pain. Because life-threatening hypoventilation could occur at any dose in patients not taking chronic opiates, do not use in opioid non-tolerant patients.

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. Certain drugs are allowed a 7 day supply while prior authorization is being requested. PDL IMPLEMENTATION DATE 01-15-05

Iowa Medicaid Drug Prior Authorization Criteria

The drug prior authorization unit will consider other conditions as listed in the compendia on an individual basis after reviewing documentation submitted regarding the medical necessity. The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated. Duplicate use of drugs from the same therapeutic category or therapeutic duplication will not be considered. All required trials must be of appropriate dose and duration for the indication and must be documented by the prescriber, on the request for prior authorization form, including dates, dose, and nature of failure. The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

Updated 1/01/2025

<p><i>Use IL-5 Antagonists PA form</i></p>	<p>b. Documentation of an adequate trial and therapy failure with at least one preferred medication from each of the following categories:</p> <ul style="list-style-type: none"> i. Nasal corticosteroid; and ii. Oral corticosteroid; and <p>6. Prescribed by or in consultation with an allergist, hematologist, immunologist, otolaryngologist, pulmonologist, or rheumatologist. If criteria for coverage are met, an initial authorization will be given for 3 months for a diagnosis of severe asthma with an eosinophilic phenotype and eosinophilic granulomatosis with polyangiitis or 6 months for a diagnosis of hypereosinophilic syndrome or CRSwNP to assess the need for continued therapy. Requests for continuation of therapy will be based on continued medical necessity and will be considered if one or more of the following criteria are met:</p> <p>Severe Asthma with an Eosinophilic Phenotype:</p> <ul style="list-style-type: none"> 1. Patient continues to receive therapy with an ICS, LABA and LTRA; and 2. Patient has experienced a reduction in asthma signs and symptoms including wheezing, chest tightness, coughing, shortness of breath; or 3. Patient has experienced a decrease in administration of rescue medication (albuterol); or 4. Patient has experienced a decrease in exacerbation frequency; or 5. Patient has experienced an increase in predicted FEV₁ from the pretreatment baseline. <p>Eosinophilic Granulomatosis with Polyangiitis</p> <ul style="list-style-type: none"> 1. Patient has demonstrated a positive clinical response to therapy (increase in remission time). <p>Hypereosinophilic Syndrome:</p> <ul style="list-style-type: none"> 1. Patient has demonstrated positive clinical response to therapy (improvement of symptoms and/or reduction in the number of flares); and 2. Medication continues to be used in combination with stable doses or at least one other HES therapy. <p>Chronic Rhinosinusitis with Nasal Polyps (CRSwNP)</p> <ul style="list-style-type: none"> 1. Patient has demonstrated positive clinical response to therapy (improvement in symptoms); and 2. Continues to receive medication as add-on maintenance therapy with a nasal corticosteroid spray. <p>The required trials may be overridden when documented evidence is provided that use of these agents would be medically contraindicated.</p>
<p>Immunomodulators- Topical</p> <p><i>Elidel</i> <i>Protopic</i></p> <p><i>Use Immunomodulators- Topical PA form</i></p>	<p>Prior authorization (PA) is required for topical immunomodulators. Payment for non-preferred topical immunomodulator products will be authorized only for cases in which there is documentation of a previous trial and therapy failure with a preferred agent. Payment for pimecrolimus (Elidel) or tacrolimus (Protopic) 0.03% will be considered for non-immunocompromised patients two years of age and older and tacrolimus (Protopic) 0.1% for patients 16 years of age and older when there is an adequate trial and therapy failure with one preferred topical corticosteroid, except on the face or groin. If criteria for coverage are met, requests will be approved for one tube per 90 days to ensure appropriate short-term and intermittent utilization of the medication. Quantities will be limited to 30 grams for use on the face, neck, and groin, and 60 grams or 100 grams for all other areas. The required trials may be overridden when documented evidence is provided that use of these agents would be medically contraindicated.</p>

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. <p>Non-Parenteral Vasopressin Derivatives of Posterior Pituitary Hormone Products <i>Use Non-Parenteral Vasopressin Deriv. of Posterior Pituitary Hormone Products PA form</i></p>	<p>Prior authorization (PA) is required for non-parenteral vasopressin derivatives of posterior pituitary hormone products. No PA is required for members 6 years of age or older when dosed within established quantity limits for desmopressin acetate tablets. Payment for preferred non-parenteral vasopressin derivatives of posterior pituitary hormone products will be authorized for the following diagnoses:</p> <ol style="list-style-type: none"> 1. Diabetes Insipidus. 2. Hemophilia A. 3. Von Willebrand's disease. <p>Requests for desmopressin nasal spray for the treatment of nocturnal enuresis will not be considered. Payment for non-preferred non-parenteral vasopressin derivatives will be authorized only for cases in which there is documentation of trial and therapy failure with the preferred agent. Please refer to the Selected Brand-Name Drugs prior authorization form is requesting a non-preferred brand-name product.</p>
<p>Non-Preferred Drug <i>Use Non-Preferred Drug PA form</i></p>	<p>Prior authorization (PA) is required for non-preferred drugs as specified on the Iowa Medicaid Preferred Drug List. Payment for a non-preferred medication will be considered for an FDA approved or compendia indicated diagnosis only for cases in which there is documentation of previous trial and therapy failure with the preferred agent(s), unless evidence is provided that use of these agents would be medically contraindicated. Request must adhere to all FDA approved labeling for requested drug and indication, including age, dosing, contraindications, warnings and precautions, drug interactions, and use in specific populations.</p>
<p>Nonsteroidal Anti-inflammatory Drugs <i>Use Non-Steroidal Anti-inflammatory Drug PA form</i></p>	<p>Prior authorization (PA) is required for all non-preferred nonsteroidal anti-inflammatory drugs (NSAIDs). Payment for a non-preferred NSAID will be considered under the following conditions:</p> <ol style="list-style-type: none"> 1. Documentation of previous trials and therapy failures with at least three preferred NSAIDs; and 2. Requests for a non-preferred extended release NSAID must document previous trials and therapy failures with three preferred NSAIDs, one of which must be the preferred immediate release NSAID of the same chemical entity at a therapeutic dose that resulted in a partial response with a documented intolerance. <p>The required trials may be overridden when documented evidence is provided that use of these agents would be medically contraindicated.</p>
<p>Odevixibat (Bylvay) <i>Use Odevixibat (Bylvay) Drug PA form</i></p>	<p>Prior authorization (PA) is required for odevixibat (Bylvay) Payment will be considered under the following conditions:</p> <ol style="list-style-type: none"> 1. Request adheres to all FDA approved labeling including age, dosing, contraindications, warnings and precautions, and drug interactions; and 2. Patient has a diagnosis of genetically confirmed progressive familial intrahepatic cholestasis (PFIC) type 1 or 2; and <ol style="list-style-type: none"> a. Genetic testing does not indicate PFIC type 2 with ABCB 11 variants encoding for nonfunction or absence of bile salt export pump protein (BSEP-3); and b. Patient has moderate to severe pruritis associated with PFIC; or 3. Patient has a diagnosis of Alagille Syndrome (ALGS) confirmed by genetic testing demonstrating a JAG1 or NOTCH2 mutation or deletion; and <ol style="list-style-type: none"> a. Patient has cholestasis with moderate to severe pruritis; and b. Documentation of previous trials and therapy failures, at a therapeutic dose, with at least two of the following agents: <ol style="list-style-type: none"> i. Ursodeoxycholic acid (ursodiol) ii. Cholesytramine iii. Rifampin; and 4. Patient's current weight in kg is provided; and 5. Is prescribed by or in consultation with a hepatologist, gastroenterologist, or a prescriber who specializes in PFIC or ALGS <p>Initial authorizations will be approved for 3 months for initial treatment or after a dose increase. Additional authorizations will be considered</p>

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. Certain drugs are allowed a 7 day supply while prior authorization is being requested. PDL IMPLEMENTATION DATE 01-15-05

Iowa Medicaid Drug Prior Authorization Criteria

The drug prior authorization unit will consider other conditions as listed in the compendia on an individual basis after reviewing documentation submitted regarding the medical necessity. The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated. Duplicate use of drugs from the same therapeutic category or therapeutic duplication will not be considered. All required trials must be of appropriate dose and duration for the indication and must be documented by the prescriber, on the request for prior authorization form, including dates, dose, and nature of failure. The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

Updated 1/01/2025

	<p>when the following criteria are met:</p> <ol style="list-style-type: none"> 1. Patient’s current weight in kg is provided; and 2. Documentation is provided the patient has responded to therapy and pruritis has improved. If there is no improvement in pruritis after 3 months of treatment with the maximum 120 mcg/kg/day dose, further approval of odevixibat will not be granted.
Omalizumab (Xolair)	<p>Prior authorization (PA) is required for omalizumab (Xolair) prefilled syringe. Requests for omalizumab (Xolair) lyophilized powder for reconstitution will not be considered through the pharmacy benefit. Request must adhere to all FDA approved labeling for requested drug and indication, including age, dosing, contraindications, warnings and precautions, drug interactions, and use in specific populations. Payment for omalizumab (Xolair) prefilled syringe will be considered under the following conditions:</p> <ol style="list-style-type: none"> 1. Therapy will be initiated in a healthcare setting, under the guidance of a healthcare provider, where the patient can be closely observed for anaphylaxis and safety of therapy has been established after a minimum of 3 doses of omalizumab; and 2. The healthcare provider has determined self-administration with omalizumab is appropriate based on careful assessment of risk for anaphylaxis and mitigation strategies, as outlined in the label; and 3. Prescriber is an allergist, dermatologist, immunologist, otolaryngologist or pulmonologist; and 4. For a diagnosis of asthma, chronic rhinosinusitis with nasal polyps, IgE-mediated food allergy, and any other FDA approved diagnosis where dosing is dependent on serum IgE level and body weight, the pretreatment IgE level and body weight in kilograms (kg), is provided. Note: according to the label, there is insufficient data to recommend a dose for certain pretreatment IgE levels and body weight. PA requests will be denied in these instances; and 5. Patient has access to an epinephrine injection to treat allergic reactions that may occur after administration of omalizumab (Xolair); and 6. Prescriber and dispensing pharmacy will educate patient on proper storage and administration. Improperly stored medications will not be replaced. <p><u>Moderate to Severe Persistent Asthma</u></p> <ol style="list-style-type: none"> 1. Patient has a diagnosis of moderate to severe persistent asthma for at least one year; and 2. Patient has a history of positive skin or RAST test to a perennial aeroallergen; and 3. Patient is currently using a high dose inhaled corticosteroid, long-acting beta-agonist, AND a leukotriene receptor antagonist, and is compliant with therapy and asthma symptoms are not adequately controlled after at least three (3) months of therapy. <p>If the criteria for coverage are met, the initial authorization will be given for 16 weeks to assess the need for continued therapy. Requests for continuation of therapy will not be granted for patients who have not shown adequate response to omalizumab (Xolair) therapy and for patients who do not continue concurrent use with a high dose corticosteroid, long-acting beta-agonist, and leukotriene receptor antagonist.</p> <p><u>Chronic Idiopathic Urticaria</u></p> <ol style="list-style-type: none"> 1. Patient has a diagnosis of moderate to severe chronic idiopathic urticaria; and 2. Patient has documentation of a trial and therapy failure with at least one preferred second-generation antihistamine, one of which must be cetirizine at a dose up to 20 mg per day; and 3. Patient has documentation of a trial and therapy failure with at least one preferred first-generation antihistamine; and

Worsening of respiratory symptoms and an increased extent of fibrotic changes on HRCT only. <p>If the criteria for coverage are met, initial requests will be given for 6 months. Additional authorizations will be considered at 6 month intervals when the following criteria are met:</p> <ul style="list-style-type: none"> 1. Adherence to pirfenidone (Esbriet) or nintedanib (Ofev) is confirmed; and 2. Documentation of a positive response to therapy, defined as meeting at least one of the following: <ul style="list-style-type: none"> a. Rate of lung function decline slowed; or b. Improved or no worsening of symptoms of cough, shortness of breath; and 3. Documentation is provided that the patient has remained tobacco-free; and 4. ALT, AST, and bilirubin are assessed periodically during therapy.
---	--

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. Certain drugs are allowed a 7 day supply while prior authorization is being requested. PDL IMPLEMENTATION DATE 01-15-05

Iowa Medicaid Drug Prior Authorization Criteria

The drug prior authorization unit will consider other conditions as listed in the compendia on an individual basis after reviewing documentation submitted regarding the medical necessity. The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated. Duplicate use of drugs from the same therapeutic category or therapeutic duplication will not be considered. All required trials must be of appropriate dose and duration for the indication and must be documented by the prescriber, on the request for prior authorization form, including dates, dose, and nature of failure. The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

Updated 1/01/2025

<p>Proton Pump Inhibitors</p> <p><i>Use Proton Pump Inhibitor PA form</i></p>	<p>Prior authorization (PA) is not required for preferred proton pump inhibitors (PPI) for doses within the established quantity limits of one unit per day.</p> <p>Requests for PPIs exceeding one unit per day will be considered for the following diagnoses with additional documentation regarding the medical necessity:</p> <ol style="list-style-type: none"> 1. Barrett’s esophagus, Erosive esophagitis, or Peptic stricture (Please fax a copy of the scope results with the initial request); or 2. Hypersecretory conditions (Zollinger-Ellison syndrome, systemic mastocytosis, and multiple endocrine adenomas); or 3. Recurrent peptic ulcer disease; or 4. Gastroesophageal reflux disease will be considered after documentation of a therapeutic trial and therapy failure with the requested PPI at maximal dose within the established quantity limit of one per day. Requests for PPIs exceeding one unit per day will be considered on a short term basis (up to 3 months). After the three month period, a dose reduction to the recommended once daily dosing will be required. A trial of the recommended once daily dosing will be required on an annual basis for those patients continuing to need doses beyond one unit per day; or 5. Helicobacter pylori will be considered for up to 14 days of treatment with documentation of active infection. <p>Payment for a non-preferred proton pump inhibitor will be authorized only for cases in which there is documentation of previous trials and therapy failures with three preferred products.</p>
<p>Pulmonary Arterial Hypertension Agents</p> <p><i>Use Pulmonary Arterial Hypertension Agents PA form</i></p>	<p>Prior Authorization (PA) is required for agents used to treat pulmonary hypertension. Payment will be approved under the following conditions:</p> <ol style="list-style-type: none"> 1. Diagnosis of pulmonary arterial hypertension
<p>Quantity Limit Override</p> <p><i>Use Quantity Limit Override PA form</i></p>	<p>Designated drugs are limited to specific quantity limitations. These drugs are identified on the Iowa Medicaid Quantity Limit Chart posted on the website www.iowamedicaidpdl.com under the Billing/Quantity Limits tab. Providers should submit a Prior Authorization (PA) request for override consideration.</p>
<p>Repository Corticotropin Injection (H.P. Acthar Gel)</p> <p><i>Use Repository Corticotropin Injection (H.P. Acthar Gel) PA form</i></p>	<p>Prior authorization (PA) is required for repository corticotropin injection. Payment will be considered under the following conditions:</p> <ol style="list-style-type: none"> 1. Patient is under two years of age and 2. Patient has a diagnosis of infantile spasms. <p>Treatment of compendia indicated steroid-responsive conditions will only be considered upon documented contraindications or intolerance to corticosteroids not expected to occur with the use of repository corticotropin injection.</p> <p>If criteria for coverage are met, authorization will be provided for up to 30 days of treatment for all indications.</p>

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. Select Preventative Migraine Treatments	<p>Prior authorization (PA) is required for select preventative migraine agents. Payment for non-preferred select preventative migraine agents will be considered only for cases in which there is documentation of a previous trial and therapy failure with a preferred, select preventative migraine agent. Payment will be considered under the following conditions:</p> <ol style="list-style-type: none">1. Patient has one of the following diagnoses:<ol style="list-style-type: none">a. Chronic Migraine, defined as:<ol style="list-style-type: none">i. ≥ 15 headache days per month for a minimum of 3 months; andii. ≥ 8 migraine headaches days per month for a minimum of 3 months; orb. Episodic Migraine, defined as:<ol style="list-style-type: none">i. 4 to 14 migraine days per month for a minimum of 3 months; orc. Episodic Cluster Headache, defined as:<ol style="list-style-type: none">i. Occurring with a frequency between one attack every other day and 8 attacks per day; andii. With at least 2 cluster periods lasting 7 days to one year (when untreated) and separated by pain-free remission periods ≥ 3 months; andiii. Patient does not have chronic cluster headache (attacks occurring without a remission period, or with remissions lasting < 3 months, for at least 1 year); and2. Request adheres to all FDA approved labeling for requested drug and indication, including age, dosing, contraindications, warnings and precautions, drug interactions and use in specific populations; and3. The requested agent will not be used in combination with another CGRP inhibitor for the preventative treatment of migraine; and4. Patient has been evaluated for and does not have medication overuse headache; and5. For Episodic and Chronic Migraine, patient has documentation of two trials and therapy failures, of at least 3 months per agent, at a maximally tolerated dose with two different migraine prophylaxis drug classes (i.e. anticonvulsants [divalproex, valproate, topiramate], beta blockers [atenolol, metoprolol, nadolol, propranolol, timolol], antidepressants [amitriptyline, venlafaxine]); or6. For Episodic Cluster Headache, patient has documentation of<ol style="list-style-type: none">a. A previous trial and therapy failure at an adequate dose with glucocorticoids (prednisone 30mg per day or dexamethasone 8mg BID) started promptly at the start of a cluster period. Failure is defined as the need to use acute/abortive medications (oxygen, triptans, ergotamine, lidocaine) at least once daily for at least two days per week after the first full week of adequately dosed steroid therapy; andb. A previous trial and therapy failure at an adequate dose of verapamil for at least 3 weeks (total daily dose of 480mg to 960mg). Failure is defined as the need to use acute/abortive medications (oxygen, triptans, ergotamines, lidocaine) at least once daily for at least two days per week after three weeks of adequately dosed verapamil therapy.7. Lost, stolen, or destroyed medication replacement requests will not be authorized. <p>Initial requests will be approved for 3 months. Additional Pas will be considered upon documentation of clinical response to therapy (i.e., reduced migraine frequency, reduced migraine headache days, reduced weekly cluster headache attack frequency).</p> <p>The required trials may be overridden when documented evidence is provided that use of these agents would be medically contraindicated.</p>

<p>Select Oncology Agents</p> <p><i>Use Select Oncology Agents PA form</i></p>	<p>Prior authorization (PA) is required for select oncology agents. Patient must have a diagnosis that is indicated in the FDA approved package insert or the use is for an indication supported by the compendia (including National Comprehensive Cancer Network (NCCN) compendium level of evidence 1, 2A, or 2B). The following must be submitted with the PA request: copies of medical records (i.e. diagnostic evaluations and recent chart notes), location of treatment (provider office, facility, home health, etc.) if medication requested is not an oral agent, the original prescription, and the most recent copies of related laboratory results. If criteria for coverage are met, initial authorization will be given for three (3) months. Additional authorizations will be considered for up to six (6) month intervals when criteria for coverage are met. Updates on disease progression must be provided with each renewal request. If disease progression is noted, therapy will not be continued unless otherwise justified.</p>
<p>Select Topical Psoriasis Agents</p> <p><i>Use Select Topical Psoriasis Agents PA form</i></p>	<p>Prior authorization (PA) is required for select topical psoriasis agents. Payment for a non-preferred agent will be considered for an FDA approved or compendia indicated diagnosis for the requested drug when the following criteria are met:</p> <ol style="list-style-type: none"> 1. Request adheres to all FDA approved labeling for requested drug and indication, including age, dosing, contraindications, warnings and precautions, drug interactions, and use in specific populations; and 2. Patient has a diagnosis of plaque psoriasis with involvement estimated to affect $\leq 20\%$ of the body surface area; and 3. Patient has documentation of an adequate trial and therapy failure of combination therapy with a preferred medium to high potency topical corticosteroid and a preferred topical vitamin D analog for a minimum of 4 consecutive weeks. <p>The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated.</p>
<p>Selected Brand Name Drugs</p> <p><i>Use Selected Brand Name PA forms</i></p>	<p>Prior authorization (PA) is required for selected brand-name drugs, as determined by the Department, for which there is available an “A” rated bioequivalent generic product as determined by the Federal Food and Drug Administration, unless the brand drug has been designated by the Department as preferred (payable) under the Iowa Medicaid Preferred Drug List (PDL). For PA to be considered, the prescriber must submit a completed Selected Brand Name PA form and Iowa Medicaid MedWatch form with:</p> <ol style="list-style-type: none"> 1. Documentation of trials and therapy failures with two different generic manufacturers of the same chemical entity. If an allergy to an inactive component is suspected, the second trial must be with a generic product that does not contain the allergen, if available. 2. Documentation of the failure must include the specific adverse reaction as defined by the FDA (See Section B of the MedWatch form). Intolerances, such as nausea or vomiting, to the generic drug will not be considered as a basis for approval. <p>Trials may be overridden when evidence is provided that use of the generic product would be medically contraindicated.</p>

For all drugs requiring prior authorization, in the event of an emergency situation when a prior authorization request cannot be submitted and a response received within 24 hours such as after regular working hours or on weekends, a 72-hour supply of the drug may be dispensed and reimbursement will be made, unless otherwise noted in criteria. Certain drugs are allowed a 7 day supply while prior authorization is being requested. PDL IMPLEMENTATION DATE 01-15-05
