Prior authorization is required for non-preferred benzodiazepines. Payment for non-preferred benzodiazepines will be authorized in cases with documentation of previous trial and therapy failure with two preferred products. Prior authorization will be approved for up to 12 months for certain documented diagnoses and a 3 month period for all other diagnoses. If a long-acting medication is requested, one of the therapeutic trials must include the immediate release form of the requested benzodiazepine. The prescriber must review the patient's use of controlled substances on the Iowa Prescription Monitoring Program website and determine if the use of a benzodiazepine is appropriate for this member. For patients taking concurrent opioids, the prescriber must document the following: 1) The risks of using opioids and benzodiazepines concurrently has been discussed with the patient. 2) Documentation as to why concurrent use is medically necessary is provided. 3) A plan to taper the opioid or benzodiazepine is provided, if appropriate. The required trials may be overridden when documented evidence is provided that use of these agents would be medically contraindicated.

IMPORTANT NOTE: *In evaluating requests for prior authorization the consultant will consider the treatment from the standpoint of medical necessity only. If approval of this request is granted, this does not indicate that the member continues to be eligible for Medicaid. It is the responsibility of the provider who initiates the request for prior authorization to establish by inspection of the member's Medicaid eligibility card and, if necessary, by contact with the county Department of Health and Human Services, that the member continues to be eligible for Medicaid.*
